META₁₅₀

150 lm/W energy efficiency

Protected light

Long life is guaranteed by:

High dissipation thermal management system

that keeps semiconductors unaltered over time

100% testing

with 24h burn-in cycles

Gore-tex® anti-condensation

breathing valve

Anti-yellowing lenses

created by Palazzoli, in PMMA

- High-level electronic components with surge discharge protection up to 10 kV
- X-ray testing of LED weld joints
- Extra clear and resistant tempered glass diffuser

META₁₅₀

Quick installation

Thanks to the innovative pendant mounting system, replacing inefficient light fixtures is a simple “take it out and put in” operation without any adaptation and adjustment. Each META₁₅₀ is equipped with the watertight connector for a quick plug and play connection.

Various mounting options

META₁₅₀'s technical accessory system is the most flexible available. The light fixture can be mounted in various ways: pendant, on busbar, ceiling, pole, wall, light tower and catenary wire.

Italian Design

META₁₅₀ has received a special award in Germany: the Red Dot Design Award, the most important international design award that honours the exceptional quality of an Italian company.

Well-distributed light

META₁₅₀ is designed for areas with different installation heights (from 5 m to 9 m). It produces a uniform and well-distributed light to enhance vertical surfaces, floors and work surfaces.

Excellent service

Palazzoli offers the most suitable lighting solution for every type of need, with proposals specifically designed for all the different industrial applications.

Guaranteed and certified performance.

Photometric data compliance is guaranteed through certification by an independent body (DEKRA) with the affixing of the ENEC PLUS mark.

META₁₅₀

150 lm/W energy efficiency

Datasheet

META₁₅₀ is the new addition to the META range of professional pendant light fixtures with an efficiency of up to 150 lm/W, with LEDs arranged in a circular crown that allow uniform lighting without the need for adjustments.

This efficacy allows you to save over 70% on energy consumption.

Savings are further improved by the lumen set from 12000 lm to 37000 lm which allows you to reduce the number of light fixtures installed.

The META₁₅₀ light is protected by a die-cast aluminium body with an anti-corrosion treatment and by a tempered glass or HACCP polycarbonate diffuser.

The quality of the light can be seen from the high visual comfort given by the PMMA lenses designed and built by Palazzoli. The lifetime over 230.000 hours and the Italian design make META₁₅₀ the best solution for industrial, retail and sports lighting.

The photometric curves (LDT file) are available on the website www.palazzoli.com

Body material	EN 46100 aluminium alloy
Surface treatment	Fluorozirconate passivation
Surface finish/colour	Hot-polymerised non-toxic polyester RAL 7011
Diffuser material	Extra-clear tempered glass or polycarbonate

META₁₅₀-EX

150 lm/W energy efficiency

ZONE	GAS			DUST		
	0	1	2	20	21	22
USABLE			X		X	X

The META₁₅₀-EX series is the new line of ATEX pendant light fixtures for zones 2, 21 and 22 with an efficiency up to 150 lm/W. This efficacy allows you to save over 70% on energy consumption. META₁₅₀-EX is equipped with a high dissipation thermal management system that keeps the semiconductors unaltered over time. The input and connection to the terminal board is via 'Ex e' cable gland without having to make any insulation. The power supply electronics have been made in compliance with the EN 60079-18 Standard with 'Ex mb' protection mode (encapsulation). Thanks to the comfort beam optics available in the catalogue, areas with combustible dusts and flammable gases can be illuminated in the best possible way.

The photometric curves (LDT file) are available on the website www.palazzoli.com

Datasheet

META is the first industrial luminaire with LEDs arranged in a circular crown that allow uniform lighting without the need for adjustments.

The body is made of die-cast aluminium with anti-corrosion treatment, finished with an anti-scratch powder coating.

The 4 mm thick extra-clear tempered glass diffuser guarantees maximum resistance in harsh environments with chemical substances.

Thanks to the different beam optics available in the catalogue for extra wide, narrow, elliptical and asymmetrical distributions, work areas can be illuminated in the best possible way, guaranteeing visual comfort and the best lighting performance.

Floodlight accessories

Universal mount for pole-top and projecting bracket for Ø 60 mm and Ø 76 mm poles

Kit consisting of collar and plate for Ø 60 mm to Ø 80 mm pole mounting

Manufacturing material	Palazzoli Code	Pack Qty.
painted galvanised steel	811908	1

Manufacturing material	Palazzoli Code	Pack Qty.
painted galvanised steel	811912	1

Accessories

Bracket for mounting on double chain and busbar

Manufacturing material	Palazzoli Code	Pack Qty.
galvanised steel	810997	1

0 - 90° adjustable bracket for double chain mounting

Manufacturing material	Palazzoli Code	Pack Qty.
galvanised steel	810996	1

Kit with bracket for ceiling mounting

Manufacturing material	Palazzoli Code	Pack Qty.
galvanised steel	810998	1

Set of brackets for Ø 60mm pole mounting

Manufacturing material	Palazzoli Code	Pack Qty.
galvanised steel	810995	1

Adjustable bracket for wall, pole and light tower mounting

Manufacturing material	Palazzoli Code	Pack Qty.
painted galvanised steel	810999	1

Adjustable 0 - 90° bracket for catenary wire mounting

Manufacturing material	Palazzoli Code	Pack Qty.
galvanised steel	810994	1

Protection guard

Manufacturing material	Palazzoli Code	Pack Qty.
galvanised steel	810993	1

CONNECTOR

Emergency kit

Manufacturing material	Emergency duration	Palazzoli Code	Pack Qty.
aluminium alloy	1h	810992	1
	3h	810991	1

Equipment included: the emergency kit comes complete with junction box, battery, inverter and interface bracket.

Features: 1 M20 entry and 1 exit with connector.

Notes: the interface bracket is designed for double fixed chain connection and quick connection for pendant mounting.

When performing the horizontal pole mounting, adjustable mounting, ceiling mounting and adjustable bracket mounting, the emergency kit must be mounted close to the unit (max 1.5 m).
