

RINO

AISI 304
stainless steel

LIGHTING

Palazzoli

• Simplified installation

The fastening system with eyebolts enables the luminaire to be mounted to the ceiling without opening it. The light fixture is powered by means of a connector for quick connection to the power grid.

• Resistant and safe

The stainless steel casing and the total absence of welded joints guarantee a high resistance to corrosion and aggressive atmospheres.

• Improved visual comfort

The extra wide beam, narrow beam and comfort optics using specialist lenses with a glare index of $UGR < 22$.

• Efficient and effective

The latest generation of LED technology ensures high luminous efficiency up to 142 lm/W.

Wide range of solutions and accessories

RINO is the new series of watertight light fixtures in AISI 304 stainless steel and painted galvanized steel. They are also suitable for applications where greater resistance to environmental aggression is required.

There are 5 versions available:

- On/Off
- DALI
- Emergency 1h and 3h
- HT +55 °C

and various fastening accessories:

Pendant
(standard)

Adjustable
code 820010

Ceiling
code 820017

Pole fitting
code 820016

Environments and materials

AISI 304 stainless steel

Material characterized by a higher resistance to oxidation and corrosion. Easy to clean and with excellent hygienic coefficient.

Suitable for: cellars, poultry sheds, kitchen hoods, livestock industries, greenhouses and with redundancy in all environments where galvanized steel is required.

Painted galvanized steel

Material with a zinc coating to protect the steel from corrosion. Special care is used in the cleaning phase to avoid damaging the protective coating.

Suitable for: storage areas, cold storage rooms, garages, gymnasiums, prisons, electrical and mechanical industries.

Glass diffuser

The glass diffuser maintains the characteristics of high transparency and guarantees the uniformity of the luminous flux over time.

Polycarbonate diffuser

The UV stabilized polycarbonate diffuser meets the HACCP requirements for food environments and maintains its characteristics over time.

Custom light

EXTRA WIDE BEAM OPTICS

opening: 110°

For effective illumination of the whole area.

For heights from 3 m to 5 m

Installation example:

Device code 822482 (63w - 8946lm)

- (h) installation height: 3.5 m
- (i) interdistance between devices in a row: 9 m
- (p) span between rows: 9.5 m

COMFORT OPTICS

opening: 88°

UGR < 22

It reduces glare and controls the emission in the transverse plane, restricting the emission for angles above 60°.

For heights from 5 m to 10 m

Installation example:

Device code 821482 (63w - 8631lm)

- (h) installation height: 8 m
- (i) interdistance between devices in a row: 9 m
- (p) span between rows: 9.5 m

NARROW BEAM OPTICS

opening: 30° x 90°

UGR < 22

It enables to have large longitudinal spans in the presence of shelving. The control of the light beams by means of the lenses makes the work environment comfortable.

For longitudinal spans with shelving

Installation example:

Device code 820482 (63w - 8001lm)

- (h) installation height: 8 m
- (i) aisle width: 2.5 m
- (p) span between rows: 12 m

RINO

Quality, Reliability, Durability,
Convenience, Beauty.

Values that have always
inspired Palazzoli products.

Data sheet

Watertight LED light fixtures for use in industrial, commercial and food environments. The body is made of a single piece of AISI 304 stainless steel or galvanized steel without welded joints, able to withstand harsh environmental conditions.

The diffuser in tempered glass or UV stabilized polycarbonate is attached to the body, thanks to a system of AISI 304 stainless steel fastenings. The IP66 rating is guaranteed by a reinforced gasket in anti-ageing elastomer. The light fixture is equipped with M8 threaded eyebolts that are screwed to the body with no need to open the luminaire. They enable mounting the luminaire to chains, ropes and lighting busbars. Wiring is made with high-temperature cables with a maximum cross-section of 1.5 mm².

The luminaire are equipped with an external hermetic IP66/IP67 connector for the entry of cables with a maximum cross-section of 1.5 mm² and sheath diameter of 7 mm to 13 mm.

HT +55 °C

ON REQUEST: in addition to the codes in the brochure, it is possible to request all the light fixtures combining the materials, optics, power supplies and operating temperatures indicated in the range. Versions with feed-through wiring are also available.

The complete range of LED light fixtures for Marine and ATEX applications is available on www.palazzoli.com

The photometric curves (LDT files) are available on www.palazzoli.com

Compliance with standards	Directive 2014/35/EU EN 60598-1 EN 60598-2-1 EN 62471 EN 60598-2-22 EN 62493 IEC/TR 62778 Directive 2014/30/EU EN 55015 EN 61547 EN 61000-3-2 EN 61000-3-3 Directive 2011/65/EU EN 50581 EN 60598-2-24
Body material	AISI 304 stainless steel Painted galvanized steel
Diffuser material	Tempered glass and UV stabilised polycarbonate
Protection rating (IP as per IEC/EN 60529)	IP66
Paint	Non-toxic polyester resistant to weather conditions and UV rays
Colour	RAL 9016 (painted galvanized steel version)
Impact resistance (IK rating as per IEC/EN 62262)	IK09
Corrosion class according to ISO 9223	C5 AISI 304 stainless steel C4 painted galvanized steel
Weight	Light fixture length 690 mm: 3.4 kg Light fixture length 1300 mm: 6.2 kg
LED device efficiency	up to 142 lm/W
Colour temperature	4000K
CRI	≥ 80
Insulation class	I
Supply voltage	220V-240V 0-50-60Hz
Input surge protection according to EN 61000	2 kV
Residual flicker	< 3%
Photobiological risk	Exempt
Glare index	UGR < 22
Power factor	≥ 0.95
Max. conductor cross-section	1.5 mm ²
Entry cable diameter	7-13 mm
Emergency battery lifetime	1h-3h
Emergency battery charging time	24h
Estimated device lifetime	L80 B10 @50.000h Tq=25 °C Tq= +55 °C (HT version)
Storage temperature	-40 °C - +70 °C -30 °C - +45 °C 0 °C - +35 °C (emergency version)
Operating temperature	-30 °C - +55 °C (HT version) (Special solutions for low temperature applications available on request)
